Public Building Interventions

GOAL: Intervene in the building process to encourage Zero Energy Building

- Public building are often designed for ***50 year*** lifespan
- Zero Energy (Ready) is ideal for public buildings due to decreased annual operation and maintenance costs

Public Building Interventions

How you can help:

- Notify us about any public projects that are in the works in your city
- Connect us with the project manager or correct contact
 - Ideally *before* they have sent out an RFP or begun the design process

December In-Person Meeting

- County Zero Energy Strategic Plan
- Round Table Discussions about the Zero Energy Action Plan Template for cities
 - What kind of goals are you looking to set?
 - Is workforce development something you want to include?
 - Are reach codes feasible in your city?
 - Are you looking to focus on public, commercial, or residential buildings?
- Prepare to include your building department as we move forward
